

Northern Eco-action Gathering

The world is on the point of **ecological collapse**: global temperature rise, species extinction, nuclear waste dumping, depletion of natural resources, deforestation, to name just a few problems. These will **not be solved by governments** (who make it worse by warring for the remaining resources), but by the people and communities working co-operatively..

Come to the gathering if you want to do something about this. It doesn't matter if you are a total novice or an experienced activist. Inaction will result in collective suicide for humankind and the planet.

The time to act is NOW!!!!

Come together for workshops and discussions on:

- Action Planning
- Skills Sharing
- Strategising

Saturday 11th November 2006 10.30am - 6pm in the Bradford Resource Centre (now fully confirmed, very nice and fully accessible) - 17-21 Chapel Street, Bradford, BD1 5DT. It's only 5 minutes walk from Bradford Interchange. For more detailed travel descriptions check www.eco-action.org/northern nearer the time.

We're having to pay for this venue so we'll be asking everyone to make a donation of £2-10. Some of us will try and cook some vegan food, but it'd be great if everyone could bring some (vegan) nosh to share for lunch and dinner.

If you need a place to stay overnight, please e-mail northern@eco-action.org as we may be able to sort something out.

See you there!
